

翻译预测一：华北平原

华北平原是中国第二大平原，位于黄河下游。华北平原西邻太行山，东至海岸，北起燕山，南接淮河，面积 31 万平方公里。这里地势低平，多在海拔 50 米以下。它由黄河、淮河和海河的冲积物形成，也被称为黄河淮海平原。平原地势平坦，河湖众多，交通便利，经济发达，自古即为中国政治、经济、文化中心。

The North China Plain is the second largest plain in China,located at the lower reaches of the Yellow River. Bordering on the Taihang Mountains in the west, the coast in the east, Yanshan Mountain in the north and Huaihe River in the south, it covers 310,000 square km. It has a smooth terrain with an elevation of lower than 50 meters. Formed of alluvial deposits from the Yellow, Huaihe and Haihe rivers, it is also known as the Yellow River-Huaihe-Haihe Plain. With its flat terrain, many rivers and lakes, convenient transportation and developed economy, the plain has been the political,economic and cultural center of China since ancient times.

翻译预测二：东北平原

东北平原，是中国三大平原之一，也是中国最大的平原。东北平原位于中国东北部，地跨黑龙江、吉林、辽宁和内蒙古四个省区，地处大、小兴安岭和长白山脉之间。南北长约 1000 千米，东西宽约 400 千米，面积达 35 万平方千米。东北平原土地肥沃，这里已发展成为中国主要的粮食基地之一。除此之外，石油是东北平原最重要的矿产资源。

Northeast China Plain, one of the three major plains in China,is also the largest plain in China. Located in northeastern China, the plain spans four provinces: Heilongjiang, Jilin.Liaoning and Inner Mongolia, and lies between the Greater and Lesser Hinggan and Changbai mountains. It is about1,000 km long from north to south and 400 km wide from east to west, covering an area of 350,000 square kilometers. Northeast China Plain boasts fertile soil and it has developed into one of the major grain bases in China. In addition, oil is the most important mineral resource in Northeast China Plain.

翻译预测三：长江中下游平原

长江中下游平原是第三大平原，东西长约 1000 千米，南北宽 100400 千米，总面积约 20 万平方千米。部分地区的海拔低于 5 米，总体上低于华北平原。是由长江冲积下来的泥沙堆积而成，包括湖南、湖北、安徽、江西、江苏、浙江等省。这里是水稻、蚕桑、柑橘、淡水鱼类的主产区，长江中下游平原盛产水稻、油菜籽和蚕豆，千百年来被誉为中国的"鱼米之乡"。

The Middle and Lower Reaches of the Yangtze River Plain, the third largest plain, is about 1,000 km long from east to west and 100-400 km wide from north to south, with a total area of about 200,000 square kilometers. With part of it lower than 5 meters in elevation, it is generally lower than the North China Plain. It is formed by alluvial of the Yangtze River and lies in Hunan, Hubei, Anhui, Jiangxi, Jiangsu and Zhejiang provinces. Situated between the streams are rice paddies, mulberry and tangerine orchards, and fish ponds. The Middle and Lower Reaches of the Yangtze River Plain is one of China's leading producers of rice, rapeseed crops, and broad beans, which helps to gain its nickname "land of fish and rice" for thousands of years.

翻译预测四：祁连山（CCTV《你好，中国》系列）

The Qilian Mountains, across Chinas Gansu and Qinghai provinces, stretch for about 800 kilometers from east to west. It’ s a huge mountain range composed of many parallel mountains. About one third of the peaks are more than 4000 meters above the sea. There are more than 3000 glaciers storing tens of billions of cubic meters of water in solid form. If all the glaciers were to melt, the water generated would be enough for a city of 20 million people to use for about 20 years.

祁连山横跨中国的甘肃、青海两个省区,它东西绵延约 800 公里。是一个由很多平行山脉组成的庞大山系。祁连山大约三分之一的山峰超过 4000 米。3000 多条冰川将数百亿立方米的水以固体的形式储存在这里。如果冰川全部融化形成的水量足够一个 2000 万人口的城市使用大约 20 年。However, this mountain system in Northwest China is a island surround by drought. The Qilian Mountains are bounded by desert on three sides. To the east is the Loess Plateau with little rainfall.

然而，这片位于中国西北部的山系却是一个被干旱包围的孤岛。祁连山三面被沙漠与隔壁包围。它的东面则是降水稀少的黄土高原。

The glaciers in the mountains determine the fate of this area. Each time the weather gets warmer, the melted ice and snow of the Qilian Mountains, brings life to the deserts of Northwest China.

高山上的冰川决定着这片区域的命运。每当天气变暖，祁连山消融的冰雪会给中国西北部的荒漠带来生机。

In the north of the Qilian Mountains along the mountain ranger from east to west, melt-water from the ice and snow nourishes a narrow area of about 1200 kilometers. This region, known as the Hexi Corridor, is an important part of the ancient Silk Road. For thousands of years, Asian and European civilizations have converged and collided here. 80% of the water in this island continuously nourishing about 5 million people and 700000 hectares of cultivated land.

祁连山的北部，沿着山脉由东向西，冰雪融水滋养了一条大约 1200 公里的狭长区域。这里被称作河西走廊，它是古代丝绸之路的重要组成部分。数千年来亚欧文明在这了交汇碰撞。这片土地 80% 的水量源源不断地滋养着大约 500 万人口和 70 万顷耕地。

翻译预测五：江西庐山（CCTV《你好，中国》系列）

This is one of the most beautiful highways in China. It passes through thousands of islands in the West Sea of Lushan Mountain in Jiangxi province. There are more than 1600 islands in this area of water, creating a “lake of a thousand islands”. The lake is vast and tranquil, with an average depth of 45 meters. On a good day, the visibility in the lake can reach up to 11 meters.

这是中国最美的高速路段之一。他穿行于中国江西庐山西海的千岛之中。超过 1600 座岛屿散布在这片水域上，创造出一片千岛湖。湖面广阔平静，平均水深 45 米。天气好的时候，湖水能见度能达到 11 米。

60 kilometers to the northeast of the West Lake, there's a mountainous area. This is the famous Lushan Mountain. Lushan Mountain is not one single mountain, but rather a large upland area, consisting of 90 continuous peaks, in which the highest one id 1474 meters above the sea level. Over

tens of thousands of years, tectonic movements, glaciers erosion, flowing water and other geological processes, have created the diverse landscapes of Lushan Mountain.

从庐山西海向东北方向行进直线距离大约 60 多公里处，层峦叠嶂的山体就是大名鼎鼎的庐山。庐山不是一座单体山，而是一片庞大的山体，由 90 多座绵延不断的高峰共同组成。其中的最高峰海拔 1474 米。数万年内，构造运动、冰川侵蚀、流水等地质作用塑造了庐山多面的形态。

Running to the north of Lushan Mountain is the Yangtze, the longest river in China. The intense humidity endows Lushan with abundant water resources. There are 22 waterfalls within the mountain. Lushan Mountain is shrouded in mist for nearly 200 days of the year. The average temperature here is 5-6 degree Celsius lower than that in the plains at the same latitude. It has been a famous summer resort since ancient times.

从庐山北面经过的是中国最长的河流。丰沛的水汽赋予了庐山丰富的水资源。山中大小瀑布有 22 条。庐山一年中将近两百天被云雾缭绕。这里比同纬度平原地区平均气温低了 5 到 6 摄氏度。自古就是避暑胜地。

There' s a “City in the Clouds” some 1100 meters above sea level in the mountains. More than 100 years ago, a missionary from the UK built villas here. The average temperature in summer is only 22 degree Celsius, so it' s named Kuling, a name which comes from the English “cooling” . Today, these ancient villas are still serving tourists who come here to spend the summer.

1100 米的山间平地坐落着一个云中之城。100 多年前，一位来自英国的传教士再次打造了一个别墅区。这里夏季的平均气温只有 22 摄氏度，因此被取名为牯岭，也就是英文中凉爽的意思。如今这些古老别墅依然服务着前来避暑的游客。

翻译预测六：峨眉山（CCTV《云海中的峨眉》）

Mount Emei, located in the southwest of Sichuan province, with its back to Qinghai-Tibet Plateau, and standing on the southwest edge of the Sichuan Basin, is an ancient and famous attraction in China.

峨眉山四川省西南部，背靠青藏高原，在四川盆地的西南边缘，是中国古老而著名的游览胜地。

Three million years ago, the main part of Mount Emei rose sharply along a fault line here. Due to a

complex combination of erosion, weathering, and collapse, a massive height difference of more than 2600 meters was formed between today's mountain top and the Emei Plain.

距今 300 万年前，峨眉山主体沿断层再次剧烈抬升。在剥蚀、风化、崩塌等复杂作用下，最终形成了今天山顶与峨眉平原 2600 多米的巨大高差。

The Summit Of Ten Thousand Buddhas, at an altitude of 3099 meters, is the highest peak of Mount Emei. It has the world's highest and largest metal building complex, and is also a world cultural and natural heritage site.

海拔 3099 米的万佛顶是峨眉山的最高峰。这里拥有世界最高最大的金属建筑群，也是世界文化与自然双遗产。

In a commanding position, the Golden Summit with the biggest concentration of temples and scenic spots on Mount Emei, can be called the largest and highest place of worship of Chinese Buddhism in the world. The Buddha statue of Samantabhadra, measuring 48 meters high, is the highest golden Buddha in the world, and is the heart of the Golden Summit on Mount Emei. The ten heads of the Buddha statue are divided into three layers, each with different expressions, representing the ten mentalities of ordinary people. Many Chinese people come here to pray for the protection of the Buddha. The Golden Summit is also the perfect location to appreciate the wonderful Mount Emei 'Sea of Clouds'.

金顶是峨眉山寺庙和景点集中的制高点，堪称世界上最大最高的汉传佛教朝拜中心。高 48 米的十方普贤佛像，是世界上最高的金佛，也是峨眉金顶的中心。佛像的十个头像分为三层，神态各异，代表了世人的十种心态。许多中国人喜欢到这里祈福佛祖的保佑。金顶也是一览峨眉云海奇观的绝佳之处。

The 72 peaks of Mount Emei, are mostly over 2,000 meters above sea level. The scenery features high peaks above the clouds and the ubiquitous white mist. In such an ocean of white, the many peaks appear to float in the clouds like islands. This sea of clouds can surround Mount Emei for more than 330 days a year. Formed by ever changing patches of mist and fog, they present a unique panorama.

峨眉山的七十二峰大多海拔 2000 米以上，峰高云低，雾气皑皑。虚无缥缈的一片白色海洋中，

众多的山峰像小岛一样漂浮云中。而由一片片低云团组成的云海常常让峨眉山一年之中有超过 330 天的时间处在云雾缭绕之中。这些低云多雾汇成的云海和其他地方的云海大不相同。

Summer and autumn are the best time to view them. At every level, the scene is different. If you are lucky, it's also possible to see Gongga Mountain, 7590 meters above sea level, in the distance from the Golden Summit.

晴朗的夏季和秋季是观看云海的最好时节。不同的高度，看到的云海也各不相同。如果运气够好，从金顶这还可看到远方海拔 7590 米的贡嘎山。

翻译预测七：鞭炮

鞭炮是中国传统文化中常见的爆竹之一。它通常用于庆祝重大节日，如新年、中秋节、婚礼等。鞭炮起源于中国古代，最早记载于春秋时期，当时用来驱邪祛疫。鞭炮是一种手持爆竹，通过点燃火药来发出巨大的响声和烟雾。鞭炮有着深厚的文化底蕴和历史意义，在中国文化中被认为是吉祥和幸福的象征。现在，鞭炮在中国的节日和庆典中仍然广泛使用，是中国传统文化的重要组成部分。

Fireworks are a common form of firecrackers in Chinese traditional culture. They are usually used to celebrate important festivals such as the New Year, Mid-Autumn Festival, weddings, etc. Fireworks originated in ancient China and were first recorded in the Spring and Autumn Period, when they were used to drive away evil and disease. Fireworks are handheld firecrackers that emit a loud noise and smoke by igniting gunpowder. Fireworks have a deep cultural background and historical significance and are considered a symbol of good luck and happiness in Chinese culture. Nowadays, fireworks are still widely used in Chinese festivals and celebrations and are an important part of Chinese traditional culture.

翻译预测八：敦煌壁画

敦煌壁画是中国古代艺术的瑰宝，它位于甘肃省敦煌市莫高窟。这些壁画是在公元 4 世纪至 14

世纪之间创作的。这些壁画描绘了人物、动物、景观、宗教场景等主题，并采用了丰富多彩的颜色和细腻的线条。敦煌壁画是中国古代艺术的杰作，它们的艺术价值和历史价值都非常高。这些壁画不仅反映了中国古代宗教和文化的多样性，还反映了当时社会和历史的变迁，对了解中国古代文化和历史具有重要意义。因其独特的艺术风格和丰富的内容而被联合国教科文组织列为世界文化遗产。如今，敦煌壁画已成为世界著名的旅游景点之一，吸引着成千上万的游客前来参观。

Dunhuang murals are a treasure of ancient Chinese art, located in the Mogao Grottoes of Dunhuang City, Gansu Province. These murals were created between the 4th century AD and the 14th century, and depict figures, animals, landscapes, religious scenes, and other themes, and are characterized by their rich and colorful colors and delicate lines. Dunhuang murals are masterpieces of ancient Chinese art, and they have both high artistic and historical values. They not only reflect the diversity of ancient Chinese religion and culture, but also reflect the changes in society and history at that time, which is important for understanding ancient Chinese culture and history. They were listed as a world cultural heritage by UNESCO for their unique artistic style and rich content. Nowadays, Dunhuang murals have become a world-famous tourist attraction, attracting thousands of visitors.

翻译预测九：儒家文化

儒家文化是中国古代传统文化中最重要的文化之一，它是中国古代传统哲学和伦理学的代表。儒家文化以其独特的思想和文化影响了中国数千年的历史。儒家的主要思想是以"仁"为核心的伦理道德，即尊重父母、孝顺父母、忠诚国家、恪尽职守等。儒家文化还强调礼仪、教育、治国理念、统治方式等。儒家文化对中国古代社会和文化有着深远的影响，至今仍在影响着中国现代社会。在中国古代，儒家文化是统治阶层的主流思想，也是中国古代教育的重要组成部分。

Confucian culture is one of the most important traditional cultures in ancient China, it represents the ancient Chinese traditional philosophy and ethics. Confucian culture has influenced China for thousands of years with its unique ideas and culture. The main idea of Confucianism is ethical morals

centered on "ren" (benevolence), such as respecting parents, filial piety, loyalty to the country, and performing one's duties. Confucian culture also emphasizes etiquette, education, governance concepts, and ruling methods. Confucian culture has had a profound impact on ancient Chinese society and culture and continues to influence modern Chinese society. In ancient China, Confucian culture was the mainstream ideology of the ruling class and an important component of ancient Chinese education.

翻译预测十：京沪高速铁路

京沪高速铁路是新中国成立以来一条建设里程长、投资大、标准高的高速铁路。线路由北京南站至上海虹桥站，全长 1318 公里，连接京津冀和长江三角洲两大地区。高速铁路系统的运营非常成功，它运载的乘客是全国民航系统运载的乘客的两倍。京沪高速铁路实现了让旅客“安全出行、方便出行、温馨出行”的目标，取得了良好的经济效益与社会效益。

The Beijing- Shanghai high-speed railway is a high-speed railway with long construction mileage, large investment and high standards since the founding of the People's Republic of China. The line is 1318 kilometers long from Beijing South Railway Station to 2 Shanghai Hongqiao Railway Station, connecting Beijing- Tianjin-Hebei region and the Yangtze River Delta. The operation of high-speed railway system is very successful, and it carries twice as many passengers as the national civil aviation system, It has achieved the goal of "safe, convenient and warm travel" for passengers, and achieved good economic and social benefits

难点点拨:

- 1.建设里程长，译为 long construction mileage
- 2.京津冀和长江三角洲两大地区，译为 the Beijing-Tianjin-Hebei region and the Yangtze River Delta
- 3.全国民航系统 the national civil aviation system 运载，可用 carry 来表示
- 4.“倍数+as+many/ much/large 等形容词+(比较的内容)+as".

【翻译热词】阅卷老师全喜欢的高分短语!

- 1.Beijing- Shanghai high-speed railway 京沪高速铁路
- 2.long construction mileage 建设里程长
- 3.the founding of the People's Republic of China/the founding of New China 新中国成立
- 4.Beijing South Railway Station 北京南站
- 5.Yangtze River Delta 长江三角洲地区
- 6.Beijing-Tianjin-Hebei region 京津冀
- 7.twice as many A as B A 是 B 的两倍
- 8.national civil aviation system 国家民航系统

翻译预测十一：人口问题（近年热点）

当前，全社会对人口问题(issue of population)的认识不断深化。人们对于人口问题已经达成了以下共识:人口增长有利于实现人口与经济、社会、资源、环境的协调发展和可持续发展;解决人口问题还应强调提高人口素质和健康水平，提高人类生活质量，实现人的全面发展;人口问题本质上是发展问题，只有通过经济、社会、文化的全面发展，才能最终得以解决。

Currently, the whole society is gaining a better understanding of the issue of population. It is agreed that the growth of population is beneficial to a coordinated and sustained development between population and economy, society, resources and environment. To solve the population problem, emphasis should be laid on the improvement of the population quality, health level and quality of life so as to realize the all-round development of all humanity. The issue of population is essentially a problem of development and could only be solved through economic, social and cultural development.

【翻译热词】阅卷老师全喜欢的高分短语!

- 1.issue of population 人口问题

- 2.gain a better understanding of 更好地理解
- 3.the growth of population 人口增长
- 4.a coordinated and sustained development 协调和可持续发展
- 5.population quality 人口素质
- 6.all-round development 全面发展
- 7.health level 健康水平
- 8.cultural development 文化发展

【高频词汇】

- 1.coordinate[kau'5:di:net] v.协同动作;协调(考过 7 次)
- 2.sustain[sa'stein] v.维持, 保持 (考过 14 次)
- 3.essentially[ɪ'senʃli] adv.本质上;根本上(考过 11 次)

翻译预测十二：新能源汽车（近年热点）

财政部(Ministry of Finance)表示, 将对新能源汽车提供补贴, 以帮助促进其推广。政府部门、公共机构和公共交通将是新政策针对的主要对象。补贴标准将按照新能源汽车和与其对应的传统车型的基本价格差来制定, 但会依据每年的生产规模和技术进步程度而逐年递减。主要目标区域是大都市或城市群(city cluster), 因为这些城市承受着巨大的节能减排压力, 例如北京—天津—河北城市群、长江三角洲(the Yangtze River Delta)地区和珠江三角洲(the Pearl River Delta)地区。

Subsidies will be provided on new-energy vehicles to help facilitate their promotion, the Ministry of Finance said. Government organizations, public institutions and public transportation will be the key targets for the new policy. The subsidy standards will be rated according to basic price differences between new-energy automobiles and their traditional counterparts, but will decrease each year due to scale of production and level of technological progress. The key target regions will be mega-cities or city clusters, as they are under heavy pressure to save energy and cut emissions, for example the

Beijing-Tianjin-Hebei city cluster, the Yangtze River Delta area and the Pearl River Delta region.

翻译预测十三：人工智能（今年 ChatGPT 爆火）

人工智能是推动数字化转型的关键技术，在助力中国推动产业升级、促进数字经济与实体经济深度融合方面发挥着越来越重要的作用。中国人工智能产业发展取得了重大进展，一些领域的技术创新能力位居世界前列。官方数据显示，我国人工智能核心产业规模已经超过 4000 亿元，相关企业超过 3000 家，智能芯片和开源框架等关键核心技术正取得重大突破。

Artificial intelligence, a key technology for driving digital transformation, is playing an increasingly vital role in accelerating China's push for industrial upgrading and promoting the in-depth integration of the digital economy and real economy. Significant progress has been made in developing China's AI industry, with technological innovation capabilities in some areas ranking among the best in the world. Official data showed that the value of China's core AI industries exceeds 400 billion yuan, and the number of related enterprises stands at more than 3,000, with major breakthroughs being made in key core technologies such as smart chips and open-source frameworks.

翻译预测十四：豆腐

有没有一种既便宜，又美味而且营养丰富的食物？有！它就是中国的豆腐。2100 多年前，一位贵族渴望长生不老，他每天研制各种药方。一天他不小心把石膏碰翻到豆浆中。豆浆凝固成一块白白嫩嫩的东西。它大胆尝了一下，发现非常美味。这就是我们今天的豆腐。豆腐的原材料非常简单主要是黄豆，它含有丰富的蛋白质。豆腐可以搭配鱼，蔬菜等食材烹饪。也可以生吃。最简单的吃法是放点小葱和油，一点点盐，这就是一盘美味的豆腐了。豆腐的味道清淡，入口即化。在中国，每家的餐桌上可都少不了豆腐。

Is there a kind of food that is cheap, delicious and nutritious? Yes! It is Chinese dou fu. Some 2100years ago, a noble who longed for immortality developed all kinds of prescriptions every day. One

day, he accidentally dropped plaster into soybeanmilk. The soybean milk curdled into something like pudding. He boldly tested it and found it very delicious. The new dish is what we called dou fu food today. Dou fu is made of soybeans, which are rich in protein. Dou fu can be cooked with fish, vegetables and other ingredients. We can also eat it rare. The easiest way is to put a little bit of chives ,oil and salt with dou fu. Dou fu tastes light, yummy and really melts into your mouth. In China, dou fu is quite popular. You can find it on any dining table.

翻译预测十五：丝绸

有一种叫蚕的虫子，他吐出洁白的丝。中国人把这些丝收集起来，纺成线、织成布，这就是丝绸。丝绸质地柔软光滑，非常轻薄。是最上等的衣料。这是 2000 多年前人们从墓葬中发现的一个中国古人穿过的丝绸衣服,它重量不足 50 克，可以装进一个火柴盒里。中国的丝绸也被西方视同珍宝。约在公元前 1 世纪，商人们将中国丝绸不远万里运送到罗马。这条商路被成为丝绸之路。相比其他面料，丝绸更为细腻，透气。穿起来也最舒适。现在用丝绸做出的衣服，更加时尚现代。千百年来中国的丝绸仍然以它的高质量闻名于世。

A kind of insect called a silkworm produces white, raw silk threads. Chinese people collect these raw threads, create yarn and weave them. The silk fabrics are soft, smooth and light. It is the best material used in making dresses. A si chou dress 2.000 years old was unearthed in a tomb and can be put into a matchbox. Westerners cherish Chinese si chou.It was introduced to Rome around 100 BC by merchants. The route they travelled is called the Silk Road. Compared with other material, si chou is more delicate and light.The clothes made of si chou are the most comfortable. Now si chou clothes are prominent in modern fashions. Chinese si chou has been world famous for its high quality for thousands of years.
